

Funcafé with the American company BUNN supported opened on July 28 a “Computing Laboratory” on the School of Finca Los Andes, Santa Barbara, Suchitepéquez, Guatemala.

05 computers were installed to help and improve academic skills of 29 students of Los Andes School and can also meet the objectives established:

1. Efficiently use technology in the process of experimentation.
2. Recognize the main parts of a personal computer and the operating system.
3. Use and learn about Microsoft office in assigned tasks.
4. Use Word Processor tools to generate various types of solutions.

Funcafé appreciate the support to raising the level and quality of life of people in the rural area.
